

NAVAN Unveils the All-New T30 at boot Düsseldorf, Expanding Its Versatile Exploration Lineup

DÜSSELDORF, Germany – January 16, 2026 – NAVAN® Boats, the exploration-focused brand within Brunswick Corporation, today announced the global debut of the NAVAN T30 at boot Düsseldorf 2026. The T30 marks the first launch in a new family of NAVAN models planned over the next four years, setting the foundation for the brand's bold vision of modern exploration on the water.

"The NAVAN T30 is the essence of NAVAN's philosophy: exploration requires peace of mind," said Vittorio Bichucher, General Manager, NAVAN Boats. "It's a boat that is designed for boaters who want the versatility to explore, enjoy social time, or experience a day of fishing on the water, without compromising style or smooth ride quality, which the NAVAN brand is known for."

The T30 features an open, ergonomic layout with high gunwales for added stability and easy movement throughout the boat. Multi-purpose spaces, including a convertible cockpit, adapt quickly for entertaining, relaxing, or fishing. A centralized cockpit wet bar supports effortless hosting, while anglers can take advantage of an integrated livewell with optional aeration.

The T30's innovative T-Step Hull, developed at the Brunswick Boat Group Technology Center, and Mercury® outboard power deliver exceptional performance and handling, delivering a smooth, dry and efficient ride.

At the helm, a standard 12-inch Simrad® NSX® display delivers clarity and confidence, with optional technology upgrades including Simrad HALO20 radar and the 1st Mate™ Security System. Below deck, a spacious interior compartment provides ample storage and can be upgraded with a head and cushions for longer trips. Integrated storage throughout the boat and an optional T-top round out a design focused on comfort and versatility.

The NAVAN T30 is manufactured in state-of-the-art facilities in Europe and the United States, supported by NAVAN's local dealer networks, and backed by Brunswick's trusted warranty.
